

Network Advertising Player Box Wi-Fi Version

Model No.: SH-WB102

Specifications:

SH-WB102 is a comprehensive network advertising system which consists of two parts: client station(wi-fi ad player box) and sever. SH-WB102 uses ESS6461 multi-media platform and wireless access point(AP) as the basic structure.The sever gathering manages and downloads the files, can work independently without FTP or HTTP support.

The system structure is simple and easily operates, it has great **advantages**:

1. Allows LANs to be deployed without cabling, typically reducing the costs of network deployment and expansion;
2. WIFI networks support roaming, in which a mobile client station can move from one access point to another as the user moves around a building or area;
3. WIFI is a global set of standards. Numerous APs and network interfaces support various degrees of encryption to protect traffic from interception;
4. Through the server, can centralized manage thousands ad players at the same time, and download contents without time limitation.

Main Features of SH-WB102:

1. Support playing different files format
 - Video File Format: *.avi, *.mpg/mpeg, *.vob, *.dat
 - Video Code Format: mpeg1, mpeg2, divx, xvid and qucktime
 - Audio File Format: *.mp3, *.pcm, *.ac3, *.acc, *.wma
 - Photo Format: *.bmp(24bit), *.jpg/jpeg, *.gif
 - Text Format: *.txt
2. Support DHCP, DDNS
3. Support playing online: Mpeg(LAN), mp3(WAN)
4. Client station can upgrading program online
5. Support 99 groups, each group 999 terminals to centralized manage

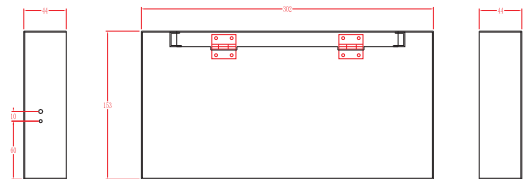

Power:

Power Input: DC 12V

Power Consumption: 3W

Accessories:

- User Manual: 1pc
- Power Cable (with adaptor): 1pc
- Remote Control: 1pc
- Keys: 2pcs
- M6 VESA Screws: 4pcs
- AV Cable: 1pc
- VGA Cable: 1pc
- Software: Yes

Structure of Network:
